EXPERIENCE

Chat App | 2024

Chat application built with React Native, designed for both iOS and Android platforms. It features real-time messaging, image sharing, location sharing, and audio messages, integrating Firebase for backend services and expo-av for audio playback functionalities.

Recipe App | 2024

The Recipe Application is a web-based platform built using Django that allows users to create, manage, and view recipes. The application includes features for automatically calculating recipe difficulty, adding pictures, and displaying charts related to recipes.

Movie App | 2023

A full-stack app that shows a list of movies. It's built with React, MongoDB, Express and Node.js. It has user login, signup and edit profile functions. It fetches data from an API and allows the user to search for a specific movie. It also allows the user to add a movie to the favorites list.
