Development,
CareerFoundry

Expertise

- Front-End Development
- Back-End Development
- Database Management
- Version Control
- Tools & Methodologies

Language

English
Mongolian

Experiences

Chat App

Chat application built with React Native, designed for both iOS and Android platforms. It features real-time messaging, image sharing, location sharing, and audio messages, integrating Firebase for backend services and expo-av for audio playback functionalities.

Movie App

A full-stack app that shows a list of movies. It's built with React, MongoDB, Express and Node.js. It has user login, signup and edit profile functions. It fetches data from an API and allows the user to search for a specific movie. It also allows the user to add a movie to the favorites list.

Meet App

I built this app to learn how to use Google Calendar API. It's a simple app that shows the user's upcoming events. It's built with React and AWS.

Hobbies and Interests

- Singing: Participated in singing competitions, demonstrating dedication and performance abilities.
- Photography: Keen eye for composition and detail, enjoying capturing moments and creating visual stories.
